PROFESSIONAL SUMMARY

Engineering student focused on building practical, user-focused digital products with AI-driven solutions. Skilled in rapid prototyping, problem-solving, and developing scalable platforms that improve user experience. Experienced in turning ideas into functional applications through innovation, teamwork, and a product-oriented approach.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Aug 2023 – Present

Parul Institute of Technology

SKILLS

Product & Strategy: Product Thinking, Feature Prioritization, User Flow Design, Requirement Analysis, Market Research, Problem Solving

AI-Assisted Development: Rapid Prototyping, AI Workflow Integration, Prompt-Based Development, Solution Architecture

Technical Understanding: HTML, CSS, JavaScript, React.js, REST APIs, Firebase, Deployment Workflows

Design & Collaboration: Figma, Wireframing, UI/UX Fundamentals, Agile/Scrum Basics, Team Collaboration, Communication

Tools & Platforms: GitHub, Netlify, Render, Postman, ChatGPT, Claude, Cursor AI, Lovable, Bolt

NOTABLE PROJECTS

Credvia — Skill Verification & Portfolio Credibility Platform

- Building an Android-first application to improve trust in developer portfolios; validated 50+ projects during the initial pilot.
- Designed systems to connect projects with credibility scores, helping reduce profile validation time.
- Developed admin features and verification logic to ensure the authenticity of student proof-of-work.
- Improved the onboarding experience to help reduce user drop-off.

ShopLens — Hyperlocal Marketplace Discovery Platform

- Created a hyperlocal marketplace concept; identified key usability gaps through competitor research and user feedback.
- Built core features like advanced search and listing visibility to make local businesses easier to find.
- Built prototypes and user journeys to make the application more intuitive and efficient.
- Designed features to help local buyers and sellers communicate easily.

OriNotes — Academic Notes Management Platform

- Built a centralized notes platform used by 300+ students, making academic content much easier to access.
- Designed access levels for students and admins to help organize content more efficiently.
- Planned features and deployment steps to ensure a stable structure for managing academic material.

PROFESSIONAL EXPERIENCE

Founder & Product Builder — TrinoVex (trinovex.in)

- Launched a platform to showcase student projects, reaching over 1,000 users.
- Worked with student creators to help their projects get more visibility through better branding and execution.
- Managed project planning and branding, using AI tools to speed up development and deployment.
- Encouraged students to share and build digital products by creating accessible sharing models.

Admission Assistant — Parul University

Apr 2025 – Jul 2025

- Streamlined student inquiry handling and verification for 30+ students daily, making coordination more efficient.
- Managed onboarding coordination and maintained accurate operational records during high-volume cycles.
- Coordinated communication and follow-ups to improve administrative efficiency in a fast-paced environment.

CERTIFICATIONS & LEADERSHIP

- Selected to represent the ShopLens prototype at technical expos, gaining feedback from industry professionals.
- Coordinated hackathon activities and collaborative initiatives for students in the innovation community.
- Conducted product case studies analyzing onboarding and usability to recommend improvements.
- Improved development processes by using AI tools, making the prototyping process faster.

CORE INTERESTS

AI Product Systems • Startup Ecosystems • Digital Product Strategy • User Experience Workflows • Rapid Prototyping • Problem-Solving Platforms
